

Automated Indexing Aqueous Cleaning System
MODEL #WWRRD-3020

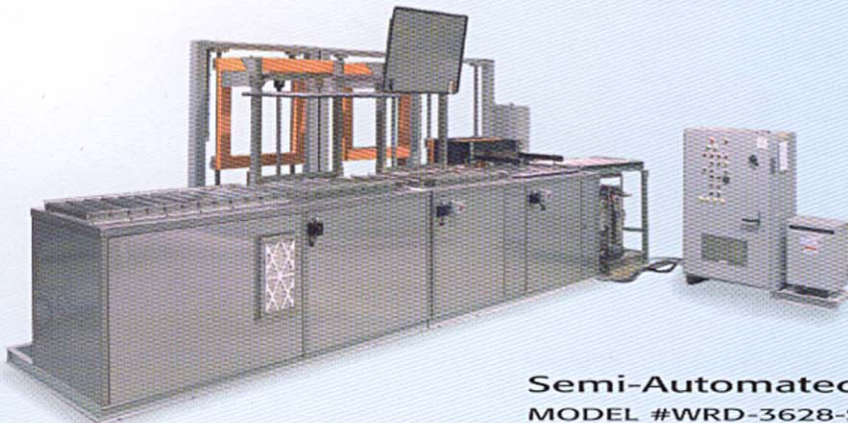

Fully enclosed, multi-stage systems provide high throughput with programmable process control. Available in gantry hoist or walking beam models typically incorporating a conveyorized hot air dryer. Tank capacities up to 800 gallons.

CUSTOM EQUIPMENT

Conveyorized Nearfield[®] Cleaning System
MODEL #NF-1803

Readily fits the standard of lean manufacturing with single piece flow every couple of seconds. High intensity ultrasonics deliver maximum cleaning power to individual parts to reduce cycle times. Automated load/unload options available.

Semi-Automated Batch Cleaning System
MODEL #WRD-3628-SP

Pneumatic lift/lower roller platforms provide process flexibility while reducing the operator labor requirements. Systems are easily fitted with various options such as oil coalescing systems, eductor turbulence, or ultrasonic rinse tank.
